## Early Pregnancy Scan 6- 10 Weeks

Are you pregnant and haven't had any scans yet?

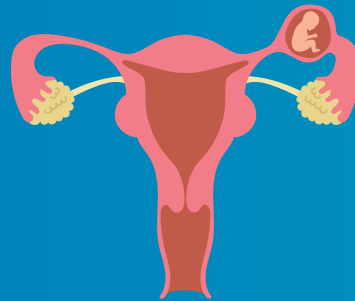

Then the first one to have is an early pregnancy scan between 6 to 10 weeks.

This scan is an important step to help assess your pregnancy. It looks at the

LOCATION

NUMBER OF SACS

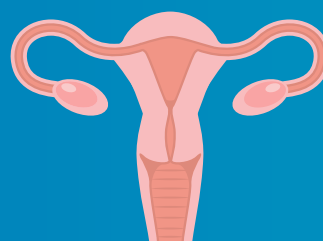

THE PRESENCE OF A HEARTBEAT

REASON FOR ANY BLEEDING.

Additionally, it evaluates the shape of the uterus and ovaries,

This scan provides comprehensive information about your health during this period.
